

FlashCut **Fashion** All-in-One

STYLISH, RELIABLE, ERGONOMIC CUTTING SYSTEMS

FlashCut Fashion All-in-One models combine processes of acquisition, automatic nesting and cutting in a single machine. Operating in continuous workflow, they both reduce cycle time and allow a single operator to execute all the production steps. Two independent cutting heads ensure the highest productivity in processing both half-hides and full-hides. Made for footwear, leather goods, furniture and automotive upholstery industries.

SEQUENTIAL ACQUISITION

Sequential steps acquisition system allows the acquisition of hides bigger than the acquisition area, but above all, processing hides step-by-step, it eases hides inspection, by approaching the area to be inspected to the operator. Moreover, it optimises the processing time, allowing to nest the shapes over the parts already examined.

FLASH TRACER OPTICAL PEN

It allows to easily mark defects and quality areas of the hides, and to display them both on the screen and directly on the hide, each one with a proper colour. Moreover, Flash Tracer operates as a mouse, able to launch nesting and cutting operations and to modify parameters directly on the working area.

PARTITIONED VACUUM SYSTEM

Powerful, partitioned, adjustable vacuum system, to be adapted to any type of material or job and concentrated where needed. It allows the best fixing during cutting and the highest energy saving at the same time.

OPTIMIZED NESTING

Customized systems for automatic nesting and friendly interface dramatically reduce the overall time for placing the shapes to be processed and optimize the material yield.

WIDE WORKING AREA

Wide acquisition, nesting and cutting surface and conveyORIZED transportation system allow to process and cut from the biggest full-hides to the smallest ones acquired simultaneously along the entire width of the table.
