

# FlashCut **Speedy** 1660 B and 2160 B

HIGH PRODUCTION KNIFE CUTTING SYSTEMS

The double cutting head together with maximum precision, reliability, power and speed, peculiar of ATOM tables, make the **Speedy models the perfect instruments to obtain maximum production and efficiency.**

These features make them perfect for footwear and leather goods.

### LOGO TYPED MATERIALS

The Intelliscan system in-line scans the logo typed materials. Together with the nesting algorithm, it allows to automatically place shapes to be cut, considering the graphic of printed materials.

### HIGH BRIGHTNESS PROJECTORS

High brightness overhead projectors assure a clear visualization of any material or color in any environment. Using LED lamps they grant high brightness, low maintenance and long life. To speed up and ease the picking of cut pieces, the software managing the back projectors gathers parts by size.

### 5- OR 7-TOOL CUTTING HEAD

To satisfy any cutting need, the Speedy tables can cut with 5- or 7-tool heads, which can be equipped with a wide range of tools.

### ACQUISITION SYSTEM

The Speedy models can work together with a wide range of off-line acquisition systems (VisionPlus models).

### FEEDING SYSTEMS

To ease the loading and feeding operations optional devices are available to handle materials in sheets, single or multiple-layers.
